

From time to time, we will invite children and families to take part in collaborative projects to keep us all connected.

Here is the first one!

Make a rainbow!

Design a rainbow to display in the window of your house.

You could use coloured pencils, felt pens, paints, collage...anything!

You can make your rainbow any size, then stick it in the window of your house. We will make some at school too and put them in the hall windows.

Use the class emails to send us photos of your rainbows and we will put them on the school website and make a book of them all.
