

# St Ippolyts CE (Aided) Primary School

## Covid Frequently Asked Questions September 2021

**National Guidance States:** People who have been fully vaccinated are no longer having to self-isolate if they are a contact of a positive case; those under 18 years of age also no longer need to self-isolate if they are a contact of a positive case.

At St Ippolyts we have conducted our own risk assessments and the following covid guidance needs to be followed, **some of which goes further than the national guidance** to protect our pupils, families, and staff.

We hope to avoid any outbreaks and ask families to support us in the approaches. Please read this guide carefully.

### If my child has symptoms, can they come to school?

No. They should remain at home. The child with symptoms should get a PCR test. If positive, they will need to self-isolate for a full 10 days. If negative and they are well, they can then return to school.

### If someone else in the household has symptoms, can my child come to school?

Yes, the child can continue to attend school *if they have no symptoms*. The person with symptoms should get a test and should self-isolate while they wait for the result.

### If someone in the household tests positive, can my child still come to school?

Officially, yes. However, it would be sensible for children to stay off school and get a PCR test. We would be very grateful if you are able to support us with this. There could be a time when there are multiple cases of Covid in a household and you may choose to keep your child at home to prevent further spread. We would provide learning for children to at home if this happened.

### **If my child is identified as a close contact from the community, can they come to school?**

Yes, *if they do not have symptoms*. The child should get a PCR test straight away. Although they can continue coming to school, parents may prefer to keep the child off until the PCR result comes back and we obviously fully support your decision if you do this.

### **If someone in the class has symptoms, what happens?**

The child will be sent home and must get a PCR test and self-isolate while waiting for the results. The other children in the class will continue to attend school.

### **If someone in the class tests positive, what happens?**

That child will self-isolate for 10 days and the family should receive a call from NHS test and trace.

All other children in the class can continue to attend school. Parents will be informed that there is a positive case in the class and should remain vigilant to any developing symptoms for their child. You may choose to take your child for a PCR test or may receive a call from Test and Trace.

### **Does my child need to take regular lateral flow tests?**

No, this is not a requirement for children in primary schools. We would encourage all adults to take regular (twice a week) lateral flow device tests to help identify early onset of covid.

### **What happens if lots of children at school tests positive?**

If this happens, we will involve our local health protection team and they will advise us if any additional action is required, such as implementing elements of our outbreak management plan. This may include wider testing or targeted closures of certain groups or classes ('bubble closures').

### **What happens if a staff member tests positive?**

The staff member will self-isolate for 10 days. The children will either be taught by a cover member of staff or TA; If the teacher is well enough, they may be able to teacher remotely into the classroom. However if the teacher is unwell, they will not be teaching remotely and will be resting and recovering.

### **If my child is self-isolating, will they get work?**

Yes. We will implement our remote education plan for any child self-isolating at home and if they are well enough, we will expect them to complete all work set and submit this via Google Classroom.

### **Will school let us know if there is a positive case?**

We will aim to keep parents informed and contact those directly affected by a positive case. We may also include general details in our newsletters.

### **If a parent has been a close contact and is not required to self-isolate (double vaccinated) can they still bring children to school?**

***Yes, but we would ask that you take some additional precautions.***

As well as getting a PCR test, we ask that you:

- Wear a mask on the school site
- Keep physical distance from other families and staff

NHS suggest:

- limiting close contact with other people outside your household, especially in enclosed spaces
- wearing a face covering in enclosed spaces and where you are unable to maintain social distancing
- limiting contact with anyone who is clinically extremely vulnerable
- taking part in twice weekly lateral flow testing

This advice applies while the person who tested positive with COVID-19 is self-isolating.

**In all circumstances – please keep school updated about any symptoms, close contacts, or positive cases.**

**As before, please err on the side of caution if your child is unwell and keep them off until they have been tested.**

If you have any other questions, please get in touch.

***Thank you for your continued cooperation***
